

OFFICIAL COALITION STATEMENT ON THE **Bipartisan American Affordability and Jobs Act of 2026** (SENATE PERMITTING BILL)

“The Senate and House bills put guardrails on revoking permits that have already been granted, and therefore we support this significant improvement to the law,” said Myron Ebell, spokesperson for the Fix the EPA Veto Coalition. “Now EPA needs to finish the work. Define ‘unacceptable adverse effects,’ rescind the pre-emptive and post-permit vetoes, and do it in a rulemaking now, before future administrations can once again use the Section 404(c) veto as a political tool to stop mining and energy projects that are already permitted and in operation.”

About the Fix the EPA Veto Coalition

*The **Fix the EPA Veto** Coalition is committed to protecting American jobs, energy development, and infrastructure by ensuring that 404(c) authority can never again be weaponized as a political tool against the energy, mineral, and infrastructure projects vital to U.S. economic strength and national security.*
